

# Coliforte

## Injection

For Veterinary Use Only

### COMPOSITION:

Each ml contains:  
Colistin Sulphate ..... 500,000 IU

### INDICATIONS:

Coliforte Injection containing Colistin is a broad spectrum antibacterial drug that is highly effective in cases of infections caused by Gram-negative pathogens, including E-coli, Salmonella, Pseudomonas, Pasteurella, Haemophilus etc.

Coliforte Injection is indicated for the treatment of infectious diseases caused by micro-organisms susceptible to Colistin, such as bacterial diarrhea, enteritis, urinary tract infections, mastitis, pneumonia and multiple arthritis of cattle.

### DOSAGE AND ADMINISTRATION:

Administer the following dose by intramuscular injection;  
1ml per 8kg body weight of animal during 3 consecutive days.

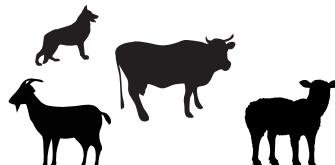

### PRECAUTIONS:

Shake well before use.  
Weight of the animals must be weighed for proper medication.  
Check accuracy of the injection guns regularly.  
In case of sheep, choose dose according to weight of heaviest sheep in the flock.  
The solution may be given with standard

automatic or single dose equipment.  
This product is only for intramuscular use.

Consult the veterinarian before use.  
Keep out of the reach of children.  
Store between 15- 25°C in a cool and dry place.
