

# OXYVIOLET

## SPRAY

For Veterinary Use Only

### COMPOSITION:

Each ml contains

Oxytetracycline HCl.....40mg

Gentian Violet ..... 4mg

### DESCRIPTION:

Oxyviolet spray is a topical spray suspension containing Oxytetracycline and gentian violet. Oxytetracycline is a broad spectrum antibiotic which effectively gives protection against bacterial infections by topical use while the addition of gentian violet imparts some antibacterial and coloring effect to suspension.

### INDICATIONS:

It is indicated for treatment of topical infections, cuts & wounds, foot rot, teat & hoof infections and other general skin infections caused by Oxytetracycline and gentian violet susceptible microorganisms in domestic animals.

### PHARMACOLOGICAL PROPERTIES:

Oxytetracycline is a broad spectrum bacteriostatic antibiotic which acts by inhibiting protein synthesis of microorganisms. Oxytetracycline is effective against gram-positive and gram-negative bacteria like Bordetella, Campylobacter, Chlamydia, Escherichia coli, Mycoplasma, Pasteurella, Rickettsia, Salmonella, Staphylococcus and Staphylococcus species.

Gentian Violet is a coloring matter, which also has antimycotic and antibacterial properties against Staphylococcus species.

### DOSAGE AND ADMINISTRATION:

Properly clean the infected area and spray from a distance of maximum 15-20 centimeters twice a day, press spray nozzle for few seconds to cover the affected area completely.

### CONTRAINDICATIONS:

Hypersensitivity to tetracycline.

Concurrent administration with penicillin,

cephalosporin and quinolones.

Animals with impaired liver or renal functions.

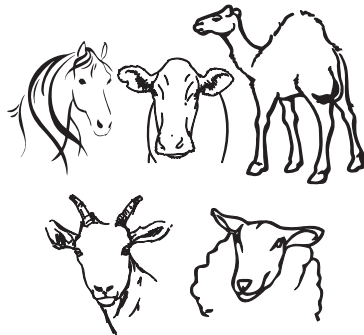

### PRECAUTIONS

- Consult the Veterinarian before use.
